Subject: Draft Environmental Policy Documents

Importance: High

Roger, I am attaching for your review draft environmental policy documents that we will be discussing at the EMC meeting next week in San Antonio.

The first is a memorandum to describe a proposed restatement of the Philip Morris Environmental Principles. The second is a proposed Statement of Environmental Policy, Principles and Requirements. The Requirements sets forth elements of effective management systems necessary to ensure that the appropriate environmental programs and activities are in place at all levels across the organization to fulfill our environmental commitment and drive continuous improvement.

Because these are confidential working documents, we ask that you not copy or further distribute them. Significant input from the EMC is needed to put the materials into final form, and approval and endorsement of senior management is required before the documents can be distributed for implementation. As we will discuss next week, we hope to make formal internal presentations early in 2002.

We look forward to seeing you in San Antonio.
